Project

Title: -

Arti Maurya's Portfolio

A portfolio is a compilation of academic and professional materials that exemplifies your beliefs, skills, qualifications, education, training, and experiences. It provides insight into your personality and work ethic.

Menu Bar

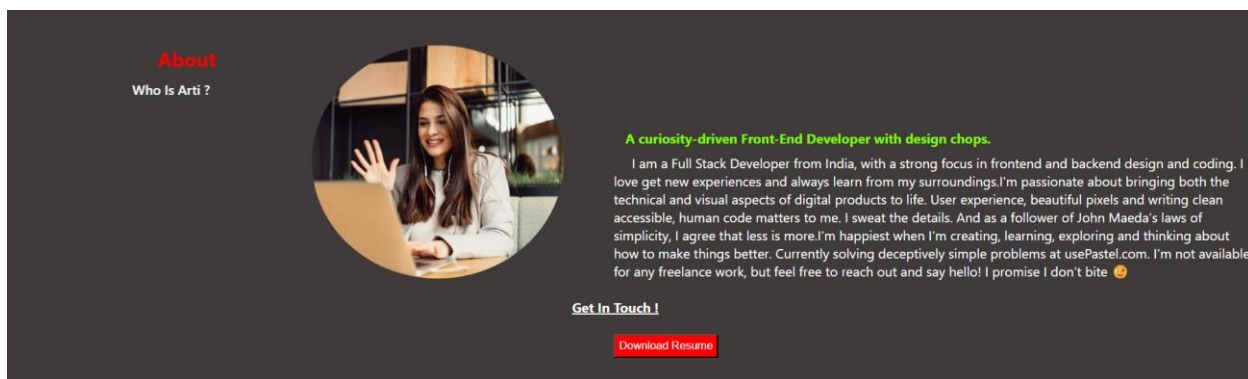

Main Section

Section 1

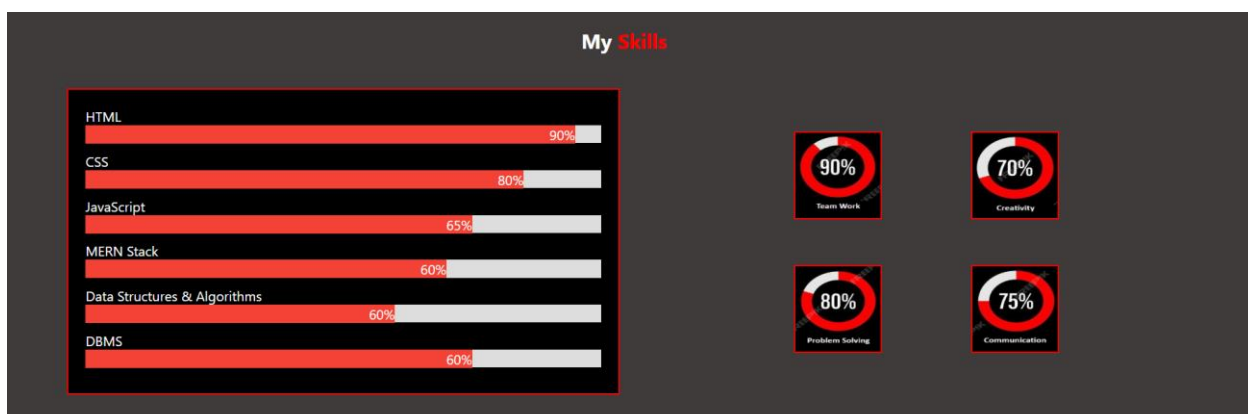

In section 1 I have short introduction and read more button then I have create links for social Icons like [Facebook](#), [Instagram](#) and [LinkedIn](#) and we display skills images also like [React](#), [NodeJs](#) and [Mongo DB](#) I have an Image also.

Section 2

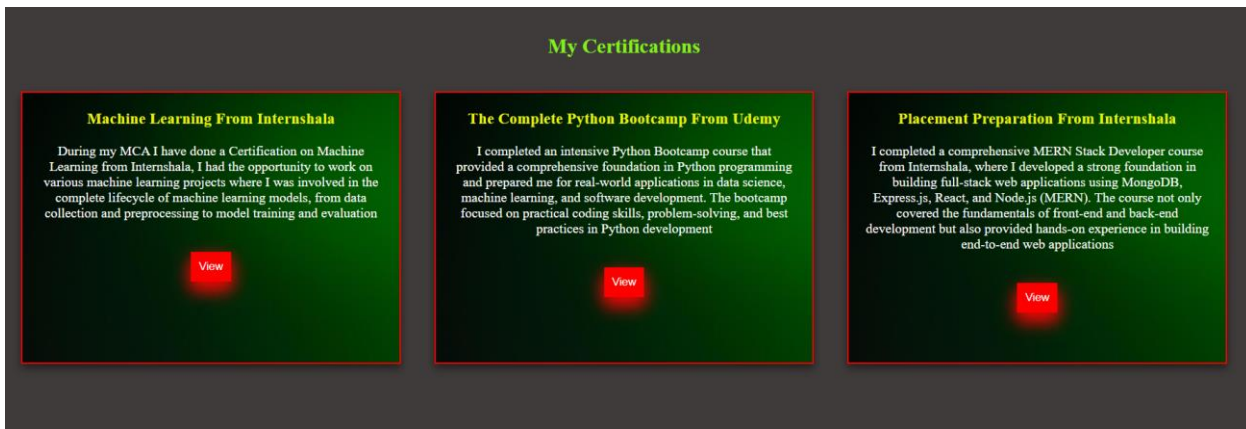

In section 2 I have give a deep introduction of mine and created [Download Resume Button](#) for better knowing of mine. I have also created a link of [Get In Touch](#) for go to the contact us section.

Section 3

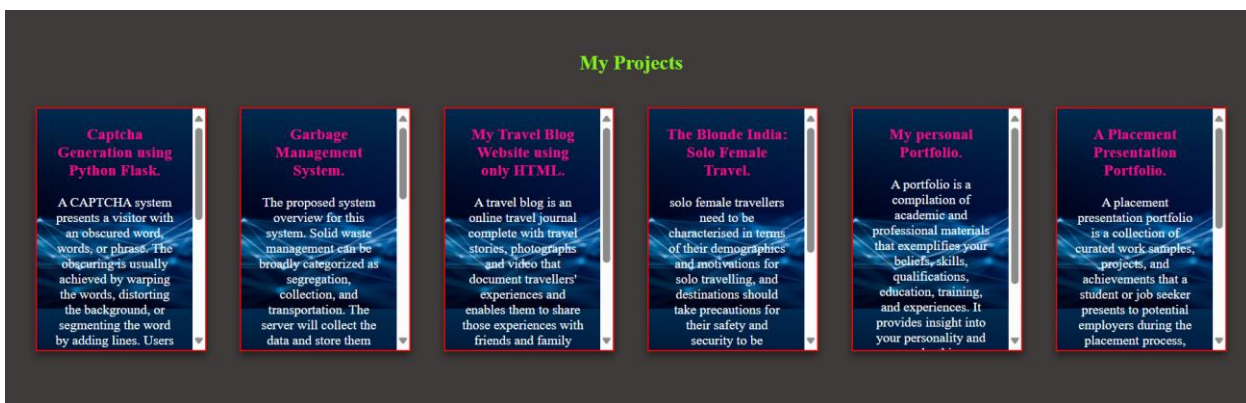

In section 3 I have define **My Skills on Languages in percentage form**.

Section 4

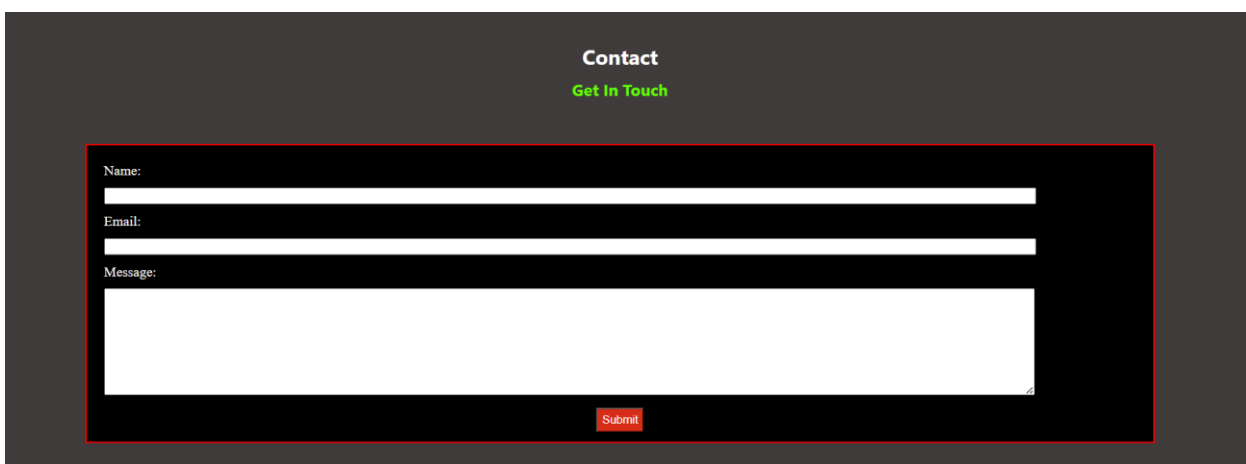

In section 4 I have given short descriptions of my certificates and here you can also see **My Certificates** through view buttons and on **buttons I use hover effects**.

Section 5

In section 5 I have given a short descriptions of **My Projects** which I have created during my college and training sessions Here I provided my **Google Drive links** to show my Projects. In every Projects cards I use **Transform effects** to create a unique visibility to the users.

Section 6

In section 6 I have create a form where users and Recruiters can fill their details where I reached them.

Footer Section

In Footer Section we can create **Linked Images** to contact me on any **Communication Media**.

Here we use **Call and Email buttons** to contact me as well and on buttons we use **hovering effects**.

      <h3>Garbage Management System.</h3><br/>
      <p>The proposed system overview for this system. Solid waste management can be broadly categorized as segregation, collection, transportation, and disposal. The server will collect the data and store them only a database. This data will be analyzed and displayed on two different dashboards. Using data analytics, reports will be generated which can be monitored by the admins through the admin dashboard. Based on the data collected, garbage trucks can be given routes generated through various algorithms and Google maps.
